**GRID-1550**

A 386SX laptop computer. It contains the software used for the programming of most of the portable radios. It is used in conjunction with a RIB kit and appropriate cables.

RIB KIT

This is the unit that is used for the programming of most of the handheld radios. It is used in conjunction with a laptop and the appropriate communication cables. It can operate from a power adapter or from a 9V power supply.

KVL KEYLOADER

The Keyloader is used for loading Keymat into the various DES capable radios. It comes with 2 batteries and different cables for all of the different radios.

EMERGENCY RESPONCE KIT

This is a roll around kit providing emergency power. The kit contains a Honda generator, VXL-501 VHF Marine Transceiver, tarp, rope, hatchet, flashlight with batteries and radio logging book.
